The Brief

Design and construct a collaboration solution for UWA Faculty of Medicine, Dentistry & Health Sciences
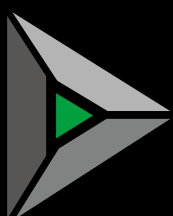

The Solution

Don't be fooled by the simplicity in view!

This facility might be pleasing to the eye however do not to underestimate the state of the art Audio Visual functionality and capabilities of this facility.

With its hidden treasures beneath the 29 desks and server room, that's what makes this facility so unique and for the front of technology.

Ian Wornes : "We researched a number of off-the-shelf collaboration solutions but found none could meet the brief. The next step was to consider a custom design. We quickly realised that with some lateral thinking, the AMX Enova range could provide a simple but flexible one-box-per-pod solution."

Terry Coe: "The outcome of this project has just been amazing. In terms of capability, this is a very complex space. But thanks to the AMX Enova systems, it is elegant, easily maintainable and simple to operate."
